# INDEX TO VOLUME 128

## Alphabetical Table of Contents of Authors

ANDERSSON, MALTE. See SVEN JONASSON

ARNOLD, STEVAN J. Limits on stabilizing, disruptive, and correlational selection set by the opportunity for selection, 143

AUSTAD, STEVEN N. See PETER M. WASER

AVILÉS, LETICIA. Sex-ratio bias and possible group selection in the social spider *Anelosimus eximius*, 1

BAKER, MYRON CHARLES, TORE K. BJERKE, HELENE LAMPE, and YNGVE ESPMARK. Sexual response of female great tits to variation in size of males' song repertoires, 491

BEGON, MICHAEL. See GEOFFREY A. PARKER

BJERKE, TORE K. See MYRON CHARLES BAKER

BLACKBURN, DANIEL G., and HOWARD E. EVANS. Why are there no viviparous birds? 165

BOLLINGER, ERIC K. See J. TIMOTHY WOOTTON

BORGIA, GERALD. See CHRISTOPHER A. LOFFREDO

BREITBURG, DENISE L. Effect of variability in recruitment on selection for protogynous sex change, 551

BRYANT, JOHN P. See SVEN JONASSON

CACCAMISE, DONALD F., and DOUGLAS W. MORRISON. Avian communal roosting: implications of diurnal activity centers, 191

CAROTHERS, JOHN H. Homage to Huxley: on the conceptual origin of minimum size ratios among competing species, 440

CASWELL, HAL, and DANIEL E. WEEKS. Two-sex models: chaos, extinction, and other dynamic consequences of sex, 707

CAVALLI-SFORZA, L. L. See S. RENDINE

CHAPIN, F. STUART, III. See SVEN JONASSON

CLARK, ANDREW G. Partitioning genetic variation in viability among lines of *Drosophila melanogaster*, 263

CLEGG, MICHAEL T. See BRYAN K. EPPERSON

COLE, BLAINE J. See DAVID W. TONKYN

CROZIER, ROSS H. See HIROTAMI T. IMAI

CURTSINGER, JAMES W. Stay times in *Scatophaga* and the theory of evolutionarily stable strategies, 130

DE JONG, G. See A. J. VAN NOORDWIJK

DUE, A. DENISE, and GARY A. POLIS. Trends in scorpion diversity along the Baja California peninsula, 460

DUNNING, JOHN B., JR. Shrub-steppe bird assemblages revisited: implications for community theory, 82

ECKERT, CHRISTOPHER G. See MARY L. REID

EMLEN, JOHN MERRITT. See STEPHEN T. EMLEN

EMLEN, STEPHEN T., JOHN MERRITT EMLEN, and SIMON A. LEVIN. Erratum. Sex-ratio selection in species with helpers-at-the-nest, 305

ENQUIST, MAGNUS. See OLOF LEIMAR

EPPERSON, BRYAN K., and MICHAEL T. CLEGG. Spatial-autocorrelation analysis of flower color polymorphisms within substructured populations of morning glory (*Ipomoea purpurea*), 840

ESPMARK, YNGVE. See MYRON CHARLES BAKER

EVANS, HOWARD E. See DANIEL G. BLACKBURN

GARRISON, ROSSER W. See JOHN E. HAFERNIK, JR.

GIESEL, JAMES T. Genetic correlation structure of life history variables in outbred, wild *Drosophila melanogaster*: effects of photoperiod regimen, 593

GOJOBORI, TAKASHI. See HIROTAMI T. IMAI
GORMAN, OWEN T. Assemblage organization of stream fishes: the effect of rivers on adventitious streams, 611
GREEN, RICHARD F. Does aggregation prevent competitive exclusion? A response to Atkinson and Shorrocks, 301
GREENE, CHARLES H. Patterns of prey selection: implications of predator foraging tactics, 824
GREENWOOD, JEREMY J. D. Crypsis, mimicry, and switching by optimal foragers, 294
GUSTAFSSON, LARS. Lifetime reproductive success and heritability: empirical support for Fisher's fundamental theorem, 761
GWYNNE, DARRYL T. Courtship feeding in katydids (Orthoptera: Tettigoniidae): investment in offspring or in obtaining fertilizations? 342

HAFERNIK, JOHN E., JR., and ROSSER W. GARRISON. Mating success and survival rate in a population of damselflies: results at variance with theory? 353
HARPER, ALAN B. The evolution of begging: sibling competition and parent-offspring conflict, 99
HARVELL, C. DREW. The ecology and evolution of inducible defenses in a marine bryozoan: cues, costs, and consequences, 810
HAY, MARK E. Associational plant defenses and the maintenance of species diversity: turning competitors into accomplices, 617
HERBOLD, BRUCE, and PETER B. MOYLE. Introduced species and vacant niches, 751
HEYWOOD, JOHN S. Erratum. The effect of plant size variation on genetic drift in populations of annuals, 772
HIBBARD, CATHERINE J. See J. TIMOTHY WOOTTON
HICKIE, JOHN P. See GRAHAM A. J. WORTHY
HUFFAKER, C. B., C. E. KENNETT, and R. L. TASSAN. Comparisons of parasitism and densities of *Parlatoria oleae* (1952–1982) in relation to ecological theory, 379
HUGHES, R. G. Theories and models of species abundance, 879

IMAI, HIROTAMI T., TAKEO MARUYAMA, TAKASHI GOJOBORI, YUTAKA INOUE, and ROSS H. CROZIER. Theoretical bases for karyotype evolution. 1. The minimum-interaction hypothesis, 900
INOUE, YUTAKA. See HIROTAMI T. IMAI

JANZEN, DANIEL H. Does a hectare of cropland equal a hectare of wild host plant? 147
JONASSON, SVEN, JOHN P. BRYANT, F. STUART CHAPIN III, and MALTE ANDERSSON. Plant phenols and nutrients in relation to variations in climate and rodent grazing, 394
JUANES, FRANCIS. Population density and body size in birds, 921

KEANE, BRIAN. See PETER M. WASER
KENNETT, C. E. See C. B. HUFFAKER

LAMBERT, DAVID M. See HAMISH G. SPENCER
LAMPE, HELENE. See MYRON CHARLES BAKER
LEDIG, F. THOMAS. See STEVEN H. STRAUSS
LEIMAR, OLOF, MAGNUS ENQUIST, and BIRGITTA SILLÉN-TULLBERG. Evolutionary stability of aposematic coloration and prey unprofitability: a theoretical analysis, 469
LEVIN, SIMON A. See STEPHEN T. EMLEN
LIVELY, CURTIS M. Canalization versus developmental conversion in a spatially variable environment, 561
LOFFREDO, CHRISTOPHER A., and GERALD BORGIA. Sexual selection, mating systems, and the evolution of avian acoustical displays, 773
LOSEY, GEORGE S., JR., FRANK G. STANTON, TERESA M. TELECKY, WILLIAM A. TYLER III, and the ZOOLOGY 691 GRADUATE SEMINAR CLASS. Copying others, an evolutionarily stable strategy for mate choice: a model, 653
LYON, BRUCE E. See ROBERT D. MONTGOMERIE

MARUYAMA, TAKEO. See HIROTAMI T. IMAI
MCARDLE, BRIAN H. See HAMISH G. SPENCER
MCKINNEY, FRANK K. Evolution of erect marine bryozoan faunas: repeated success of unilaminate species, 795

McNaughton, S. J. Grazing lawns: on domesticated and wild grazers, 937
———. On plants and herbivores, 765
Meagher, Thomas R. Analysis of paternity within a natural population of *Chamaelirium luteum*. 1. Identification of most-likely male parents, 199
Miller, David L. See Thomas R. Whittier
Montgomerie, Robert D., and Bruce E. Lyon. Does longevity influence the evolution of delayed plumage maturation in passerine birds? 930
Morris, Ralph D. See David A. Wiggins
Morrison, Douglas W. See Donald F. Caccamise
Moyle, Peter B. See Bruce Herbold
Mueller, Laurence D. Density-dependent rates of population growth: estimation in laboratory populations, 282
Muma, Katherine E. See Mary L. Reid

Nol, Erica. Incubation period and foraging technique in shorebirds, 115
Nolan, Val, Jr. See Rod Walton

Pacala, Stephen W. Neighborhood models of plant population dynamics. 4. Single-species and multispecies models of annuals with dormant seeds, 859
Parker, Geoffrey A., and Michael Begon. Optimal egg size and clutch size: effects of environment and maternal phenotype, 573
Piazza, A. See S. Rendine
Pierce, N. E., and W. R. Young. Lycaenid butterflies and ants: two-species stable equilibria in mutualistic, commensal, and parasitic interactions, 216
Pitcher, Tony J. See George F. Turner
Polis, Gary A. See A. Denise Due

Redford, Kent H. See John G. Robinson
Reid, Mary L., Christopher G. Eckert, and Katherine E. Muma. Booming odontocetes and deaf cephalopods: putting the cart before the horse, 438
Rendine, S., A. Piazza, and L. L. Cavalli-Sforza. Simulation and separation by principal components of multiple demic expansions in Europe, 681
Ribeiro, J. M. C., and A. Spielman. The satyr effect: a model predicting parapatry and species extinction, 513
Roach, Deborah Ann. Life history variation in *Geranium carolinianum*. 1. Covariation between characters at different stages of the life cycle, 47
Robbins, Louise, and Joseph Travis. Examining the relationship between functional gender and gender specialization in hermaphroditic plants, 409
Robinson, John G., and Kent H. Redford. Body size, diet, and population density of Neotropical forest mammals, 665

Schlessman, Mark A. Interpretation of evidence for gender choice in plants, 416
Searcy, William A. See Ken Yasukawa
Shank, Christopher C. Territory size, energetics, and breeding strategy in the Corvidae, 642
Sillén-Tullberg, Birgitta. See Olof Leimar
Slagsvold, Tore. Hatching asynchrony: interspecific comparisons of altricial birds, 120
Smith, R. J. F. Evolution of alarm signals: role of benefits of retaining group members or territorial neighbors, 604
Spencer, Hamish G., Brian H. McArdle, and David M. Lambert. A theoretical investigation of speciation by reinforcement, 241
Spielman, A. See J. M. C. Ribeiro
Stanton, Frank G. See George S. Losey, Jr.
Stevens, George C. Dissection of the species-area relationship among woodboring insects and their host plants, 35
Strauss, Steven H., and F. Thomas Ledig. Erratum. Seedling architecture and life history evolution in pines, 443
Sugihara, George. Erratum. Shuffled sticks: on calculating nonrandom niche overlaps, 771
Suzuki, Tadashi. Production schedules of males and reproductive females, investment sex ratios, and worker-queen conflict in paper wasps, 366

Tassan, R. L. See C. B. Huffaker
Taylor, Thomas N. See Michael S. Zavada
Telecky, Teresa M. See George S. Losey, Jr.

TONKYN, DAVID W., and BLAINE J. COLE. The statistical analysis of size ratios, 66
TRAVIS, JOSEPH. See LOUISE ROBBINS
TURNER, GEORGE F., and TONY J. PITCHER. Attack abatement: a model for group protection by combined avoidance and dilution, 228
TYLER, WILLIAM A., III. See GEORGE S. LOSEY, JR.

VAN NOORDWIJK, A. J., and G. DE JONG. Acquisition and allocation of resources: their influence on variation in life history tactics, 137

WALLACE, BRUCE. On the viability effects of chromosomes in *Drosophila*, 272
WALLER, DONALD M. Is there disruptive selection for self-fertilization? 421
WALTON, ROD, and VAL NOLAN JR. Imperfect information and the persistence of pretenders: male prairie warblers contesting for territory, 427
WASER, PETER M., STEVEN N. AUSTAD, and BRIAN KEANE. When should animals tolerate inbreeding? 529
WEATHERHEAD, PATRICK J. How unusual are unusual events? 150; Erratum, 942
WEEKS, DANIEL E. See HAL CASWELL
WEINSHALL, DAPHNA. Why is a two-environment system not rich enough to explain the evolution of sex? 736
WERNER, EARL E. Amphibian metamorphosis: growth rate, predation risk, and the optimal size at transformation, 319
WESTOBY, MARK. Mechanisms influencing grazing success for livestock and wild herbivores, 940
WHEELER, DIANA E. Developmental and physiological determinants of caste in social Hymenoptera: evolutionary implications, 13
WHITTIER, THOMAS R., and DAVID L. MILLER. Stream fish communities revisited: a case of mistaken identity, 433
WIGGINS, DAVID A., and RALPH D. MORRIS. Criteria for female choice of mates: courtship feeding and paternal care in the common tern, 126
WOODWARD, BRUCE DOUGLAS. Paternal effects on juvenile growth in *Scaphiopus multiplicatus* (the New Mexico spadefoot toad), 58
WOOTTON, J. TIMOTHY, ERIC K. BOLLINGER, and CATHERINE J. HIBBARD. Mating systems in homogeneous habitats: the effects of female uncertainty, knowledge costs, and random settlement, 499
WORTHY, GRAHAM A. J., and JOHN P. HICKIE. Relative brain size in marine mammals, 445
WYNDHAM, E. Length of birds' breeding seasons, 155

YASUKAWA, KEN, and WILLIAM A. SEARCY. Simulation models of female choice in red-winged blackbirds, 307
YOUNG, W. R. See N. E. PIERCE

ZAVADA, MICHAEL S., and THOMAS N. TAYLOR. The role of self-incompatibility and sexual selection in the gymnosperm–angiosperm transition: a hypothesis, 538
THE ZOOLOGY 691 GRADUATE SEMINAR CLASS. See GEORGE S. LOSEY, JR.

## Alphabetical Table of Contents of Titles

Acquisition and allocation of resources: their influence on variation in life history tactics. A. J. van Noordwijk and G. de Jong, 137
Amphibian metamorphosis: growth rate, predation risk, and the optimal size at transformation. Earl E. Werner, 319
Analysis of paternity within a natural population of *Chamaelirium luteum*. 1. Identification of most-likely male parents. Thomas R. Meagher, 199
Assemblage organization of stream fishes: the effect of rivers on adventitious streams. Owen T. Gorman, 611
Associational plant defenses and the maintenance of species diversity: turning competitors into accomplices. Mark E. Hay, 617

Attack abatement: a model for group protection by combined avoidance and dilution. George F. Turner and Tony J. Pitcher, 228
Avian communal roosting: implications of diurnal activity centers. Donald F. Caccamise and Douglas W. Morrison, 191

Body size, diet, and population density of Neotropical forest mammals. John G. Robinson and Kent H. Redford, 665
Booming odontocetes and deaf cephalopods: putting the cart before the horse. Mary L. Reid, Christopher G. Eckert, and Katherine E. Muma, 438

Canalization versus developmental conversion in a spatially variable environment. Curtis M. Lively, 561
Comparisons of parasitism and densities of *Parlatoria oleae* (1952–1982) in relation to ecological theory. C. B. Huffaker, C. E. Kennett, and R. L. Tassan, 379
Copying others, an evolutionarily stable strategy for mate choice: a model. George S. Losey, Jr., Frank G. Stanton, Teresa M. Telecky, William A. Tyler III, and the Zoology 691 Graduate Seminar Class, 653
Courtship feeding in katydids (Orthoptera: Tettigoniidae): investment in offspring or in obtaining fertilizations? Darryl T. Gwynne, 342
Criteria for female choice of mates: courtship feeding and paternal care in the common tern. David A. Wiggins and Ralph D. Morris, 126
Crypsis, mimicry, and switching by optimal foragers. Jeremy J. D. Greenwood, 294

Density-dependent rates of population growth: estimation in laboratory populations. Laurence D. Mueller, 282
Developmental and physiological determinants of caste in social Hymenoptera: evolutionary implications. Diana E. Wheeler, 13
Dissection of the species-area relationship among wood-boring insects and their host plants. George C. Stevens, 35
Does aggregation prevent competitive exclusion? A response to Atkinson and Shorrocks. Richard F. Green, 301
Does a hectare of cropland equal a hectare of wild host plant? Daniel H. Janzen, 147
Does longevity influence the evolution of delayed plumage maturation in passerine birds? Robert D. Montgomerie and Bruce E. Lyon, 930

The ecology and evolution of inducible defenses in a marine bryozoan: cues, costs, and consequences. C. Drew Harvell, 810
The effect of plant size variation on genetic drift in populations of annuals (Erratum). John S. Heywood, 772
Effect of variability in recruitment on selection for protogynous sex change. Denise L. Breitburg, 551
Evolutionary stability of aposematic coloration and prey unprofitability: a theoretical analysis. Olof Leimar, Magnus Enquist, and Birgitta Sillén-Tullberg, 469
Evolution of alarm signals: role of benefits of retaining group members or territorial neighbors. R. J. F. Smith, 604
The evolution of begging: sibling competition and parent-offspring conflict. Alan B. Harper, 99
Evolution of erect marine bryozoan faunas: repeated success of unilaminate species. Frank K. McKinney, 795
Examining the relationship between functional gender and gender specialization in hermaphroditic plants. Louise Robbins and Joseph Travis, 409

Genetic correlation structure of life history variables in outbred, wild *Drosophila melanogaster*: effects of photoperiod regimen. James T. Giesel, 593
Grazing lawns: on domesticated and wild grazers. S. J. McNaughton, 937

Hatching asynchrony: interspecific comparisons of altricial birds. Tore Slagsvold, 120
Homage to Huxley: on the conceptual origin of minimum size ratios among competing species. John H. Carothers, 440
How unusual are unusual events? Patrick J. Weatherhead, 150; Erratum, 942

Imperfect information and the persistence of pretenders: male prairie warblers

contesting for territory. Rod Walton and Val Nolan Jr., 427
Incubation period and foraging technique in shorebirds. Erica Nol, 115
Interpretation of evidence for gender choice in plants. Mark A. Schlessman, 416
Introduced species and vacant niches. Bruce Herbold and Peter B. Moyle, 751
Is there disruptive selection for self-fertilization? Donald M. Waller, 421

Length of birds' breeding seasons. E. Wyndham, 155
Life history variation in *Geranium carolinianum*. 1. Covariation between characters at different stages of the life cycle. Deborah Ann Roach, 47
Lifetime reproductive success and heritability: empirical support for Fisher's fundamental theorem. Lars Gustafsson, 761
Limits on stabilizing, disruptive, and correlational selection set by the opportunity for selection. Stevan J. Arnold, 143
Lycaenid butterflies and ants: two-species stable equilibria in mutualistic, commensal, and parasitic interactions. N. E. Pierce and W. R. Young, 216

Mating success and survival rate in a population of damselflies: results at variance with theory? John E. Hafernik, Jr., and Rosser W. Garrison, 353
Mating systems in homogeneous habitats: the effects of female uncertainty, knowledge costs, and random settlement. J. Timothy Wootton, Eric K. Bollinger, and Catherine J. Hibbard, 499
Mechanisms influenzing grazing success for livestock and wild herbivores. Mark Westoby, 940

Neighborhood models of plant population dynamics. 4. Single-species and multispecies models of annuals with dormant seeds. Stephen W. Pacala, 859

On plants and herbivores. S. J. McNaughton, 765
On the viability effects of chromosomes in *Drosophila*. Bruce Wallace, 272
Optimal egg size and clutch size: effects of environment and maternal phenotype. Geoffrey A. Parker and Michael Begon, 573

Partitioning genetic variation in viability among lines of *Drosophila melanogaster*. Andrew G. Clark, 263
Paternal effects on juvenile growth in *Scaphiopus multiplicatus* (the New Mexico spadefoot toad). Bruce Douglas Woodward, 58
Patterns of prey selection: implications of predator foraging tactics. Charles H. Greene, 824
Plant phenols and nutrients in relation to variations in climate and rodent grazing. Sven Jonasson, John P. Bryant, F. Stuart Chapin III, and Malte Andersson, 394
Population density and body size in birds. Francis Juanes, 921
Production schedules of males and reproductive females, investment sex ratios, and worker-queen conflict in paper wasps. Tadashi Suzuki, 366

Relative brain size in marine mammals. Graham A. J. Worthy and John P. Hickie, 445
The role of self-incompatibility and sexual selection in the gymnosperm–angiosperm transition: a hypothesis. Michael S. Zavada and Thomas N. Taylor, 538

The satyr effect: a model predicting parapatry and species extinction. J. M. C. Ribeiro and A. Spielman, 513
Seedling architecture and life history evolution in pines (Erratum). Steven H. Strauss and F. Thomas Ledig, 443
Sex-ratio bias and possible group selection in the social spider *Anelosimus eximius*. Leticia Avilés, 1
Sex-ratio selection in species with helpers-at-the-nest (Erratum). Stephen T. Emlen, John Merritt Emlen, and Simon A. Levin, 305
Sexual response of female great tits to variation in size of males' song repertoires. Myron Charles Baker, Tore K. Bjerke, Helene Lampe, and Yngve Espmark, 491
Sexual selection, mating systems, and the

evolution of avian acoustical displays. Christopher A. Loffredo and Gerald Borgia, 773
Shrub-steppe bird assemblages revisited: implications for community theory. John B. Dunning, Jr., 82
Shuffled sticks: on calculating nonrandom niche overlaps (Erratum). George Sugihara, 771
Simulation and separation by principal components of multiple demic expansions in Europe. S. Rendine, A. Piazza, and L. L. Cavalli-Sforza, 681
Simulation models of female choice in red-winged blackbirds. Ken Yasukawa and William A. Searcy, 307
Spatial-autocorrelation analysis of flower color polymorphisms within substructured populations of morning glory (*Ipomoea purpurea*). Bryan K. Epperson and Michael T. Clegg, 840
The statistical analysis of size ratios. David W. Tonkyn and Blaine J. Cole, 66
Stay times in *Scatophaga* and the theory of evolutionarily stable strategies. James W. Curtsinger, 130
Stream fish communities revisited: a case of mistaken identity. Thomas R. Whittier and David L. Miller, 433
Territory size, energetics, and breeding strategy in the Corvidae. Christopher C. Shank, 642
Theoretical bases for karyotype evolution. 1. The minimum-interaction hypothesis. Hirotami T. Imai, Takeo Maruyama, Takashi Gojobori, Yutaka Inoue, and Ross H. Crozier, 900
A theoretical investigation of speciation by reinforcement. Hamish G. Spencer, Brian H. McArdle, and David M. Lambert, 241
Theories and models of species abundance. R. G. Hughes, 879
Trends in scorpion diversity along the Baja California peninsula. A. Denise Due and Gary A. Polis, 460
Two-sex models: chaos, extinction, and other dynamic consequences of sex. Hal Caswell and Daniel E. Weeks, 707

When should animals tolerate inbreeding? Peter M. Waser, Steven N. Austad, and Brian Keane, 529
Why are there no viviparous birds? Daniel G. Blackburn and Howard E. Evans, 165
Why is a two-environment system not rich enough to explain the evolution of sex? Daphna Weinshall, 736
